

DYNAMIC FUSION SYSTEM FUNCTIONING

Dynamic Fusion Series are a new line of high performance speakers introduced by Better Music Builder using Dynamic Fusion Technology™ (DFT). The series consist of the following models: DFS-908 (8-inch), DFS-910 (10-inch), DFS-912 (12-inch) and DFS-915 (15-inch). Dynamic Fusion Series are high performance speakers developed with the

latest technology and perform with precise clarity and reliability. The versatility of these speakers and their attractive design are perfect for trendy spots such as karaoke bars, sports bars and night clubs. Because of their compact design, they can be easily mounted onto wall, ceiling and underneath the balcony.

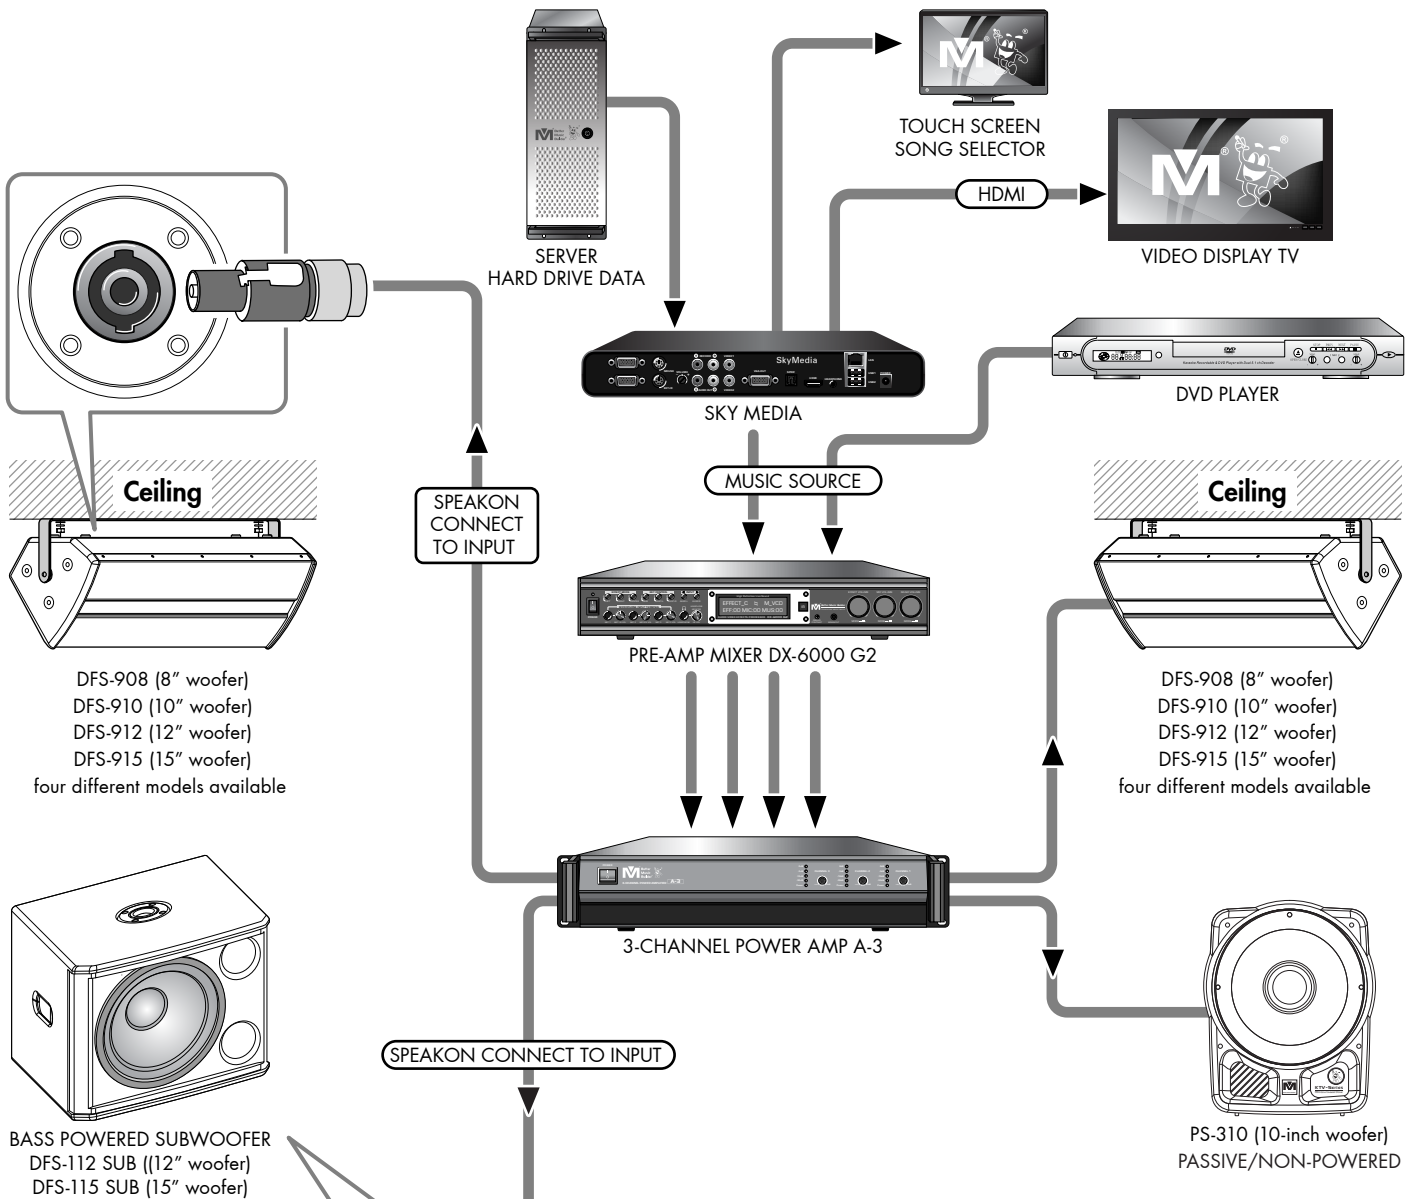

This Bass Powered Subwoofer connection panel are all the same in these models: DFS-112 SUB and DFS-115 SUB.
